Projects

Fleet Management– Kofleetz
• Kofleetz is a fleet management system with GPS tracking, trip management, and geofencing.
• Enables real-time monitoring, automated trips, and location-based alerts for better efficiency and security.
• Built with MERN Stack for scalability and performance.

Mekdam - Warehouse Management
• Middleware between SAP and Power BI, enabling seamless data transfer via API creation.
• Supports Excel upload, scheduled cron jobs, and log monitoring for API activities.
• Developed using PHP (Laravel) for efficient backend processing.

Smart Coupon Application
• Couponmanagementsystem for promotion events and customer reward tracking.
• Allows coupon creation, bill uploads by promoters, and identifies top spenders for prize distribution.
• Built using CodeIgniter for efficient backend operations.

RDD – MallInterior Submission Tool
• Interior work submission platform for mall tenants with a multi-level approval system.
• Tenants upload designs, progressing through approvals from Doc Controller, RDD Manager, and MEP Manager.
• Developed using Laravel for secure document handling and workflow automation.

Software Tools

VScode   Github

XAMPPcontrol panal   Linux

Achievements

Power House Award
Recognized by KO Innovation for outstanding contributions.

Solved 30+ problems on LeetCode, enhancing problem-solving and algorithmic skills.

Co - Curricular

• Complete C program Course in (T4TEQ)
• Paper presentation in (Sastra University)
• Complete calligraphy(Bishop Heber college)
